

1. the problem

recovery unknown

roads blocked

bridges collapsed

clouds hide ground

underserved communities

power crews

aid groups

emergency teams

Local Leaders

Local → national → global

buildings damaged

communities isolated

3. what we show

daily recovery maps
detailed timelines
resilience patterns
vulnerability hotspots

free and accessible

2. the solution

Reliability-Qualified
Nighttime Lights

a proxy for functional recovery

4. who it helps

5. what changes

fairer aid

remote areas seen

recovery made visible

targeted repairs

faster assessments
